- Utilities

Energy Saving Solutions & Incentives

Running a successful business takes a lot of effort – and we believe energy costs shouldn't be one of your worries. BWL's Commercial and Industrial team focuses on building relationships to deliver innovative solutions for business growth and energy sustainability.

Site Selection & Infrastructure Assistance

Our team will help evaluate sites for the ability to support your company's power generation needs, assisting with planning for the integration of energy efficiency features and green/renewable energy support. BWL recognizes the need for discretion when working on competitive projects and we will work directly with your leadership team to ensure trust and confidentiality.

Decision Maker Engagement

We are actively engaged in placemaking and regional economic development initiatives through collaboration with our partners on the local and state levels. These efforts not only help us better understand the current climate and opportunities in the greater Lansing area, but they also allow BWL to help connect our business partners to key decision makers.

Comprehensive Rate Analysis

We offer a wide-ranging selection of rates based on your business and its utility needs. For large-scale business operations with high load demand, we will also provide customized, unique incentive programs along with additional account support to ensure consistent, high-quality services for those with complex energy use, mixed service needs.

Specialized Customer Service

BWL consistently looks for ways to enhance the customer utility experience from proactive engagement with our partners to minimizing downtime through continuous upgrades and maintenance to increase system integrity.
